

**Mechanical system to evacuate broken tablets before packaging.**

- Linear sorter that can be integrated on all types of machine.
- Accepts products of different shapes (versatility).
- Tool change in less than 5 minutes
- No retention.
- Very high sort percentage, limiting machine stoppages due to poor filling of the blister packs
- Sort rate of 3,500 to 6,000 tablets per minute, depending on the type of tablet.
